Lost to follow-up	3	2%
Voluntary inactivity	3	2%
No status recorded	1	1%
Physical relocation	1	1%

RHD care cascade

Active RHD patients; each step is a share of the one before, Adherent of Initiated

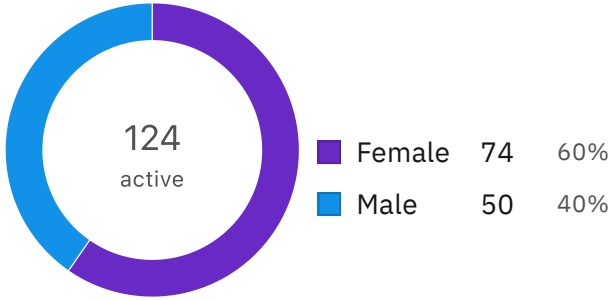

Active		82
Prescribed	74	90%
Initiated	61	82%
Covered today	40	66%
Adherent (80%+)	31	51%

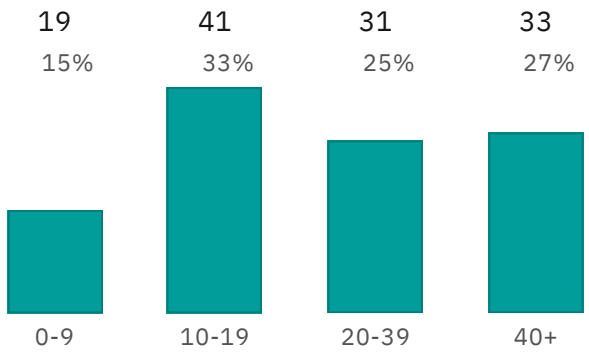

Active registrants: 124

Sex, age and disease of the patients active today

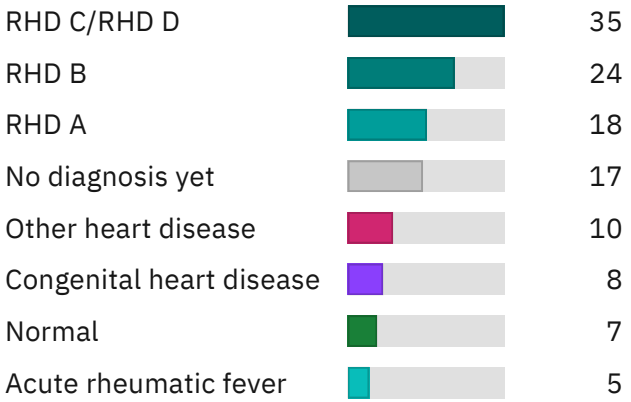

Sex

Age

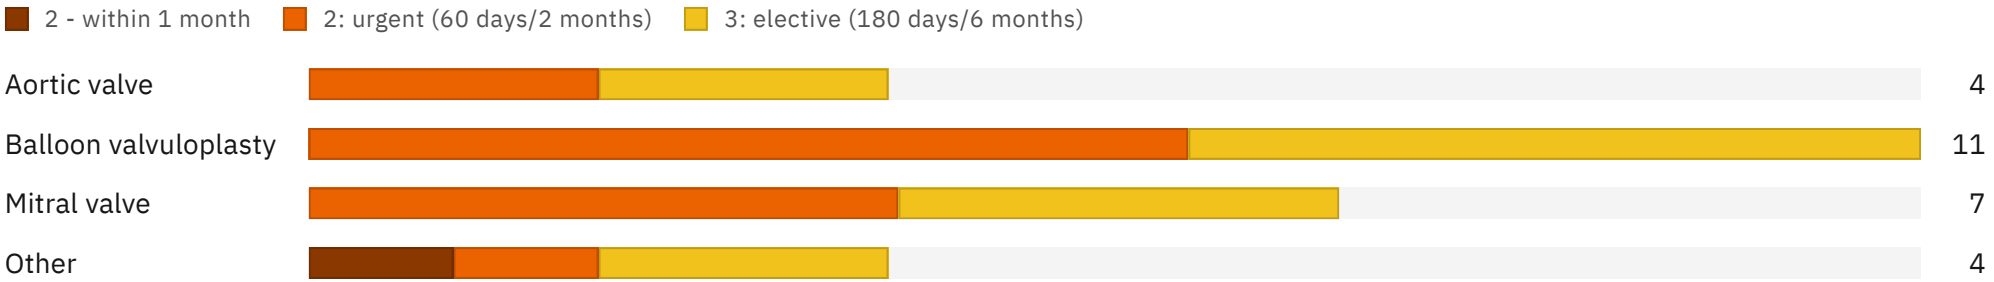

Disease

Procedural waitlist: 20 patients

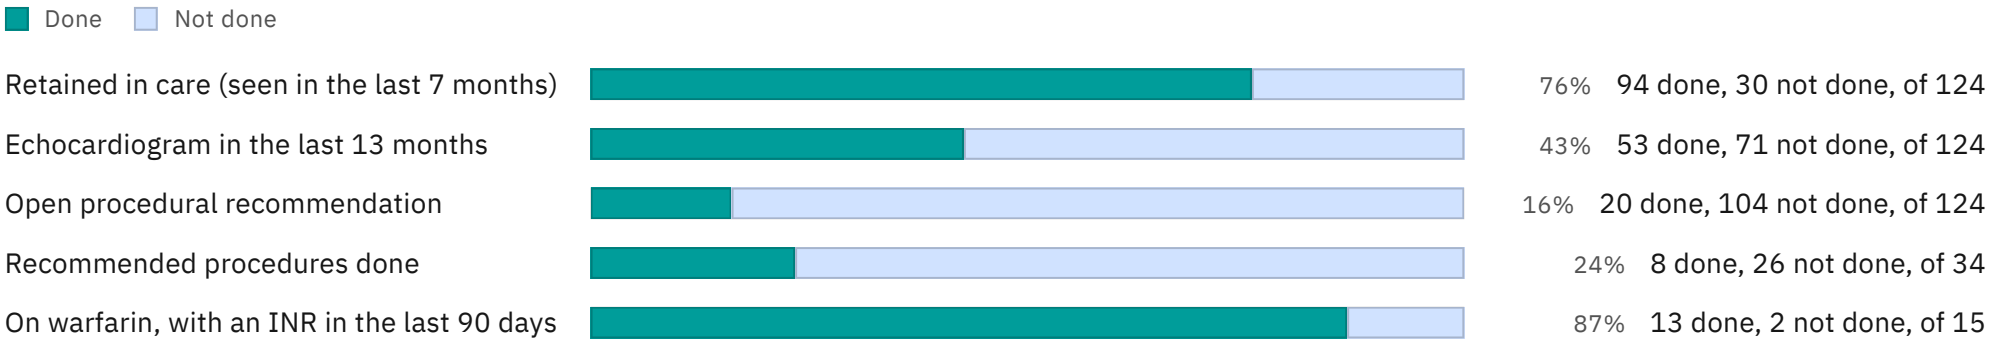

Open recommendations in each active patient's latest consultation, by urgency

Performed in the 12 months to the date shown: mitral balloon valvuloplasty 2, surgery 6

Medical optimisation

Of the 124 active registrants, unless a row says otherwise

Consultations in the last year	160

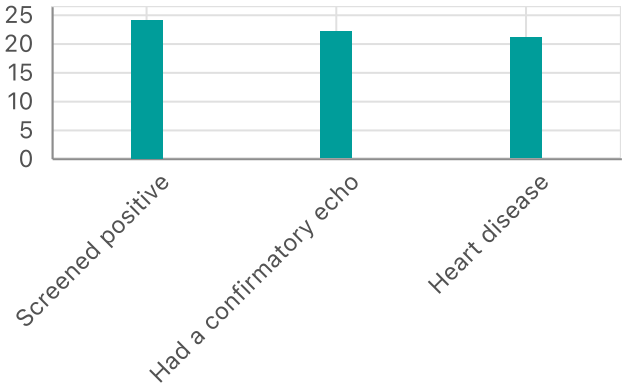

Screening

Screening programme sites

Screening cascade

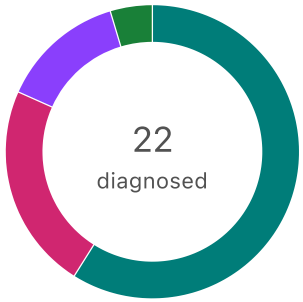

Registrants found by screening (Screen + Yes), and what their confirmatory echo showed

Cascade

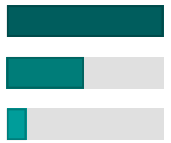

Screened positive		**24**
Had a confirmatory echo	**22**	92%
Heart disease	**21**	95%

Diagnoses after the echo

RHD	**13**
Other	**5**
Congenital	**3**
Normal	**1**

RHD details of the 13

RHD C/RHD D	**8**
RHD B	**4**
RHD A	**1**

RHD screening

Monthly counts, Uganda Heart Institute Tertiary, October 2025 to September 2026

From: October 2025 — To: September 2026

Screened	Female	Positive
0	0%	0

Result			Age			Setting		
Negative	0	0%	Children 0-9	0	0%	School	0	0%
Positive	0	0%	Adolescents 10-19	0	0%	Community	0	0%
			Adults 20+	0	0%	Health facility	0	0%

Shares are rounded so each group adds up to 100%.

Screening, from registrations

Patients registered in the period: what the registry can say about screening until screening counts are decided

Counts registered patients, not people screened: a screen-negative child is never registered.

Registered from: 29/10/2025

Registered to: 28/10/2026

Registered	Female
126	60%

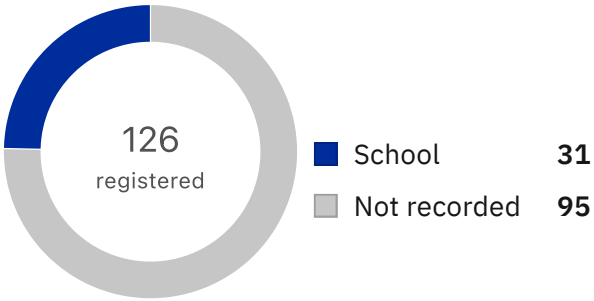

Screen +

Yes	32
Not recorded	94

Age at registration

Children 0-9	18
Adolescents 10-19	47
Adults 20+	61
